Sean Kinread

UI Engineer with Frontend leadership experience | Overdrive Design
System maintainer @ AutoGuru
Sydney, New South Wales, Australia

Summary

For 15 years I have built content-rich sites and greenfield applications that required bespoke frontend architecture, accessibility, responsive UI, and composable components.

I love to scale up and build out Design Systems, and design engineering practices. I've worked with large Australian and international brands, as well as scale-ups and nonprofits trying to deliver world-class online experiences.

My strong collaborative and cross-functional skillset works great in distributed teams. I'm drawn to projects with impact. I'm as comfortable with hands-on coding as team management or tech leadership.

Experience

AutoGuru

Senior Frontend Engineer
November 2024 - Present (8 months)
Australia

Managing the open-source AutoGuru design system: Overdrive.

Southpaw

Senior Frontend Developer
September 2024 - November 2024 (3 months)

Planned and delivered 27 components for a greenfield design system for Reece, working in a small and focused team. We used a React, Tailwind and Storybook to be efficient and complete the component library a month earlier than estimated.
